AC-Centrifugal Fan double inlet

in scroll casing with forward curved impeller

Double inlet impeller made of galvanized steel sheet with forward curved blades. Due to the high number of blades results in a sound optimized and at the same time compact design. Fluidic optimized scroll casing made from galvanised sheet metal. Double inlet. Stands respectively casing mountable in all 90° positions. Motorized Impeller statically and dynamically balanced according to DIN ISO 21940-11 with quality level G2.5. Voltage controllable AC external rotor motor. Maintenance free ball bearings, closed on both sides with long-term lubrication. Motor coated black and/or die casted aluminum. Standard configuration with cable. Motor protection is guaranteed by thermal contacts, which are inlaid into the motor windings. These contacts protect the motor from being overloaded through phase failure, too high medium temperature or locked rotor. Isolation Class F.

Fan complies with the guidelines required (Machinery-, EMC- and Low Voltage Directive) to comply with installation and conformity declaration as well as CE marking. Standard version with UL approval.
